Start a cost simulation of your business Simulate the main areas of your business See the progress of your business Analyze your financial growth Keymacro is a cost simulation of your business Your keymacro will simulate in a short time the entire cost of your business, with all the necessary data you may need in the input value panel being right at hand. See your current profit You can use this to compare the current profit to previous results. This is the data you will require in the "Setting" menu, in order to compare the previous result. You can also use the "Compare" button to do so. Analyze your financial growth You can now analyze the data in the graph, which will provide you with some insight into the development of your business. Report on your progress Using your keymacro, you can now report on your progress of your business, with the profit in the cash balance being the most important aspect to analyze. Your keymacro will simulate in a short time the entire cost of your business, with all the necessary data you may need in the input value panel being right at hand.
