Official Windows application that plugs a standard wireless connection manager built into Windows and allows you to access the same functionality from a single, easy-to-use window. Author description Founder and lead engineer of the company, spent most of his career developing desktop and mobile applications for innovative companies. He enjoys coding, reading, traveling, and spending time with his family. This is a review for Microsoft Corporation. It could contain WebDriver, BDD, xUnit or unauthenticated user experience elements that are not enabled in the core functionality. For example, this review uses performance metrics that are not available in the core functionality, but are available in xUnit framework (e.g. 100ms average load time). Thanks for the review. Here is my latest. Windows 10 October 2018 Update and latest MSDN version (7.2). As long as you are using a version or build of our Windows driver that was delivered through Windows Update, you should not see this issue. Here is a screenshot of the issue. You can read the description of the issue here: If you use any of our earlier versions of Windows Drivers (6.2.1 or earlier) you can always download the latest version of our drivers from The latest version of our driver is 6.4.1 (build number 10.0.14393.0) Thanks, Dean Hi there, Since the release of Microsoft Edge 74, it is no longer possible to manually open a PWA with a different scheme or URL on Windows 10. Now the only option to manually open a

1/2

PWA from Microsoft Edge is to select 'open with' from the pinned section of the app and select the application to open. This behavior is expected. We are investigating the option to be able to select 'always open with' in the pinned section of the application. We are investigating it and will get back to you once we have a timeline. Hi there, As per the 'Always use default' PWA setting for pinned apps, it is now possible to open pinned PWA with schemes other
