

WordnetDt is a WordNet based dictionary/thesaurus program with additional search features. WordNetDt can generate "hyponyms" ("synonyms") and "hyponym lists" ("hierarchical concepts") based on the relationship between words. WordnetDt can match words on the basis of morphology, synonymy, hyponymy and on the basis of sounds. It can perform searches using traditional, compound, elliptical, irregular and regular expressions and it can save and load a word list (repository file). FEATURES: - Synonym finder - Hierarchical concepts finder - Synonym finder with wildcards - Elliptical finder - Compound finder - Irregular finder - Compound regular expression finder - Regular expression finder - Sound finder - Merge, list and table sorts - Database & database importing and exporting - Sort and order list outputs - Wordcount and grapheme count - Wordcount and grapheme count export/import - Icon extraction - Icon decoration - List output and output formatting - Word stats including frequency, compound frequency, etc - Information tab - Links tab - Text tab - Properties tab - Displays extensive options and preferences for all commands - Command line arguments - Command line history - Keyboard shortcuts - .NET language bindings - Updated every 2 hours - Monolingual and multilingual versions - Exported as word and data tables - Error messages and debug messages - Compilation - Supported languages: French, German, Italian, Spanish, Portuguese and English BIOSno1.1All your BIOS calls are being recorded and analyzed for the purposes of improving the BIOS. Lizard AmpsHere are a few patches on Lizard amps. He has done a lot of work in mapping out what is going wrong with your amp. Very good for restoring, or giving the amp new life. In fact it's a lot of help, just run the patch file. There are some files that are needed to run this program. You must start the Patcher first. Then run the Patch. The only problem is not everyone uses the software, but it's an excellent tool. MistermazeMazeFinder is a free, lightweight and easy-to-use maze finder, thanks to which you can find the exact 70238732e0

Keymacro is a menu-driven, frame-based Macro recorder, developed in Java. With Keymacro, traders can record as many as 999 macros. It also features a stock screener which makes selecting stocks fast and easy. The user can also search for a stock using any key words and Keymacro will locate the stock and display price information, ticker, news etc. Keymacro also has a tape recorder which lets users to play back a series of actions taken on a stock chart. With the Help of Keymacro, users can easily check the performance of their trading systems and can make easy alterations to trading systems and macro's. Keymacro can be accessed from any Windows or Linux PC, and can be used from any PC, on any Internet site. Keymacro keeps track of all the actions which are performed with any stock chart on any platform and after the user is done, he can access the recorded macros by just using the saved macros, which are listed in the menu. Keymacro also stores the chart series information for a given stock chart for easy access. For example, when the user clicks on a chart, it displays the chart, price details and others. Keymacro can also be used on a mobile phone with the help of Mobile Chart Interpreter (MCI). By accessing this tool, the user can easily analyse the chart at any given time and can even make some trading decisions based on it. Keymacro works with tickers, commodities, stocks, indices, currencies, ETF's, futures, options, mutual funds, trend and volume charts. It is a universal application and works for any chart type. It can even analyse charts in the PDF format too. Keymacro supports the following chart types: + Stock + Futures + Options + Commodity + Index + Currencies + Bond + ETF's + Mutual Fund + Trend + Volume Keymacro can be downloaded for free from the website below.
