

---

TrafficFilter is a server extension that provides customizable control of Internet access. It enables management to block or allow workers' access to Internet, based on the volume of data downloaded (or uploaded) from the Internet. TrafficFilter assign a Traffic quota on a user (or group) basis. For example, user 'John' is allowed to download 500 MB a month, and after this she is denied access to the Internet. User 'Alex' is allowed to download 50 MB per week. If she goes over the 20 MB limit, she is denied further access to the Internet on that week. TrafficFilter - is a MS ISA Server extension that provides customizable control of Internet access. It enables management to block or allow workers' access to Internet, based on the volume of data downloaded (or uploaded) from the Internet. This utility is a server extension that helps you customize the control of Internet access. TrafficFilter assign a Traffic quota on a user (or group) basis. For example, user 'John' is allowed to download 500 MB a month, and after this she is denied access to the Internet. User 'Alex' is allowed to download 50 MB per week. If she goes over the 20 MB limit, she is denied further access to the Internet on that week. Here are some key features of "TrafficFilter for Microsoft ISA Server":  
• Quota policies are based on the volume of downloaded or uploaded data and time period per user or group;  
• Active Directory Support;  
• Break connections immediately when traffic limit exceeded;  
• Real-Time Monitoring allows you to monitor current quotas usage. It can be accessed by a web browser from anywhere in the network. Simply load up Explorer and type in "http://";  
• Information about all users allow only to administrators, user can see only own quota usage information;  
• ISA Server 2004, 2000 support;  
• Administrator can create custom message for users about exceeded the limit;  
• Easy installation; TrafficFilter is a server extension that provides customizable control of Internet access. It enables management to block or allow workers' access to Internet, based on the volume of data downloaded (or uploaded) from the Internet. TrafficFilter assign a Traffic quota on a user (or group) basis. For example, user 'John' is allowed to download 500 MB a month, and after this she is denied access to the Internet. User 'Alex' is 2cb456ebb3

A simple yet very useful tool that will allow you to find the thousandths in your cell phone, tablet or laptop and in any numeric application such as an address, a URL, or phone number. The ThousandthsCalculator calculates the thousandths to four decimal places (0.0001) • Unit can be selected: Uses thousandths or points • Position can be selected: Uses the first or last position • The range of numbers can be selected: For example, if you want to calculate the thousandths of numbers with greater than 1,000 then you must select the first position and the range should be "Numbers > 1000". If you want to calculate the thousandths of numbers with range from 0 to 999, then you must select the last position and the range should be "Numbers 0 - 999". • You can find the examples on the settings page. You can also create your own. App Features: • Calculate the thousandths of numbers from 0.0 - 1,000,000.0 • Show the thousandths or points as you choose from "Thousandths or Points" • Calculate the thousandths of numbers in any numeric application (Email address, phone number, URL, etc.) • Supports multitasking If you are having trouble using the application you can find help here: Is it tough for you to travel alone? Are you usually on your own in any public place? No! The basic skill of survival may help you in such a situation and in this case I would like to give you some tips that will ensure your survival. These are some tips that I would like you to be aware of. 1. Be aware of your surroundings. Always be alert. Know the difference between safe and unsafe places and know the difference between public and private areas. 2. Have a map of the city you are in so that you don't get lost. 3. When you are in an unfamiliar area, avoid crowds. At the same time keep an eye on your belongings. Watch for thieves and pickpockets. 4. Don't trust anyone. If someone offers you a cigarette, be sure that you are in a safe place. If someone offers you food or water, look for a restaurant or a shop that has food. 5. Carry fire starter and a waterproof matches in case of an emergency.
